

# Invitation IDS Return Day 2015-16

-- Thursday & Friday, 26-27 May 2016 --

Welcome back! After having worked hard in the field for the last few months, you must have a lot to share. The Return Day is an occasion for you to catch up, exchange your experiences and prepare yourself for the future. We have a 2-day programme. On the first day, all of you will have time to share your research findings and experiences. On the second day we will focus our programme on professional skill development and job perspectives in development-related work fields. In addition to two workshops in the morning, a few alumni and friends of IDS, who are working in the 'development field', will join us in the afternoon. You will be able to get some insights into the current job markets and get tips in finding interesting work after graduation.
